

# **Title: Cosmetics Insights:Navigating Cosmetics Trends and Consumer Insights With Tableau**

## **1. Problem Statement**

The cosmetics industry has multiple brands, skin types, and product categories with different pricing strategies. There is no clear visual insight into which brands are premium, which skin types have costlier products, and how categories are distributed across brands. This project aims to analyze cosmetics data and present it through interactive Tableau dashboards to help understand pricing trends and consumer product patterns.

## **2. Data Collection & Extraction**

**Data source:** Cosmetics product dataset

**Time period:** Current dataset

**Parameters Collected:** Brand, Product Name, Price, Skin Type, Category, Rank

**Tools Used:** Tableau Desktop for data connection and dashboard creation

## **3. Data Preparation / Cleaning**

**Total Used:** Microsoft Excel & Tableau Desktop

Cleaning Steps:

1. Removed duplicate entries and null values from Price column
2. Standardized brand names: BalanceCare, Zenith, DermaPure, etc.
3. Converted Price to numeric decimal format for calculations
4. Cleaned Skin Type values: Normal, Dry, Oily, Combination, Sensitive
5. Filtered out invalid Rank values and duplicate products

## **4. Data Visualization**

**Tool Used:** Tableau Desktop

### **Chart Type | Purpose**

Bar Chart | Category-Wise Price Comparison

Bar Chart | Skin Type-Wise Price Analysis

Pie Chart | Skin Type Distribution %

Horizontal Bar Chart | Brand-Wise Price Comparison

Grouped Bar Chart | Brand Vs Category Product Count

Bar Chart | Price Vs Rank Correlation Analysis

Bar Chart | Product Price Variation by Brand

## **5. Results / Insights:**

1. Cream category is the costliest at Price 263. Cleanser has lowest price 75
2. Normal skin type products have highest avg price 331. Oily skin has lowest 214
3. Moisturizer category has 2 products in each brand. Other categories have 1 product each
4. Zenith brand shows highest rank 135 indicating premium positioning
5. Normal skin type dominates with 26.0% of total products as per distribution chart

## **6. Conclusion:**

The analysis reveals that Normal skin type and Cream category are positioned at premium pricing. Moisturizer is a must-have category maintained by all brands with 2 variants each. Zenith brand shows highest rank indicating premium positioning. Skin type distribution shows Normal skin products dominate at 26.0%. These insights help in brand positioning and pricing strategy decisions.
